

OPUS INSPECTION NVAS-2 Emissions Inspection Unit

About Us

The Virginia Department of Environmental Quality has awarded Opus Inspection a contract to provide equipment and manage critical aspects of the Air Check Virginia program. Opus Inspection, based in East Granby, CT is an industry leading provider of vehicle inspection technology and services that successfully operates emissions inspection programs throughout the US.

The Opus Inspection NVAS-2 Analyzer system is the latest development in inspection system technology. This unit is specifically designed to interface with all currently approved dynamometers in use today. Our experienced team of Field service technicians will install each analyzer system making the transition to the new equipment seamless for station owners and technicians.
